

**Enforcement Division**

*Presents Course # 272*

# **Gas Turbines/Power Plants**

With an increase in demand of the electric utility industry, stationary gas turbines have become more popular in recent years as combined-cycles, peaking power plants and cogeneration facilities. The course discusses uses of gas turbines, fundamentals of operation of modern turbines with emphasis on state-of-the-art controls to achieve some of the lowest emission concentrations for this source category. The course also discusses combined cycles with HRSG units, steam turbines & power generation. This is followed by a detailed discussion on emissions and control techniques such as Dry Low-NOx combustors with staged combustion, water or steam injection followed by SCR & CO catalysts. Applicable federal & local BACT regulations, permitting requirements, and agency inspection procedures & safety concerns are thoroughly discussed. **Hard Hat, Safety Shoes & Glasses required.**

***July 14, 2005***

**8:00 AM - 5:30 PM**

**Monterey Bay APCD**

**24580 Silver Cloud Ct**

**Monterey, CA 93940**

**(831) 647-9411**
